FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS
Rome, 1985

I N T R O D U C T I O N

AGLINET is a network of large and medium sized agricultural libraries voluntarily formed within the framework of the International Association of Agricultural Librarians and Documentalists (IAALD). Its purpose is to promote mutual and rational exploitation of library resources through systematic collaboration among agricultural libraries for the efficient provision of inter-library loan service and bibliographic information. It was with this object in mind that a union list of serials was issued in 1979, and as the first edition proved to be a successful aid to librarians in locating material within the AGLINET network, it was decided to produce this second edition.

As with the first union list, titles most frequently appearing in the AGRIS data base have formed the basis of this list. However, owing to a change in the pattern of most regularly indexed titles since 1979, the second edition does not supersede, but rather compliments, the first edition. Furthermore, titles not considered to be within our subject fields (e.g. purely medical journals), and popular general titles such as Science and Nature have been dropped from this edition.

The main body of the list contains serial titles arranged alphabetically in accordance with the ISDS (International Serials Data System) Guidelines, followed by place and country of publication, ISSN number, frequency, variant, former and other language titles, and an indication of the libraries holding these titles (see Annex I for a key to the acronyms).

The index section of the list contains "see" references to connect variant old and other language titles with the main entries, and for this reason it is important to make full use of it.

When consulting this Union List of Serials it is strongly advised that all requests for inter-library loans, photocopies and other bibliographical information required, should be sent in the first instance to the AGLINET member library in the country of the serial's origin.

This second edition of the AGLINET Union List of Serials has been compiled in the David Lubin Memorial Library of FAO by Ms Linda Meyer.

Our thanks also go to the AGLINET Centres to which we are indebted for their close cooperation; to the AGRIS Coordinating Centre, FAO, which made its frequency lists available; to the Computer Systems Branch of FAO for its support; and not least to the now retired Chief Librarian of the FAO Library, Mr. K. Harada whose enthusiasm for inter-library cooperation promoted this union list.
